

Ecolink GDZW7-ECO Chamberlain and Liftmaster Limited Compatibility

Reported Observations and Technical Issue: Recently we have confirmed that the GDZW7-ECO will control Chamberlain and Liftmaster Brand Openers may or may not connect with openers with WiFi logo that use Security+2.0 manufactured from model year 2023 to present.

Investigation for Chamberlain and Liftmaster brand openers

1. Based on feedback from the field, various methods were attempted to trigger the opening and closing of a garage door using the wireless trigger for Security+ or Security+2.0 of the GDZW7-ECO to open and close the Liftmaster and Chamberlain brand garage door opener.

Investigation for Chamberlain and Liftmaster Brand Openers including Residential openers, Security+ and Security+2.0

Connect GDZW7-ECO to Opener Motor

Determine if the Opener uses Security+ or Security+2.0

- If security+ is used, following the instructions in the manual for GDZW7-ECO will connect to the opener wirelessly.
- If security+2.0 is used, attempt using the wireless connection as outlined in the manual to connect to the opener wirelessly.

Findings to wirelessly connect to opener

1. Connection to the opener with the GDZW7-ECO's wireless to the Security+ opener works.
2. Connection to the opener with the GDZW7-ECO's wireless to the Security+2.0 opener works intermittently. Openers produced prior to MD 2018 work often; openers produced between 2018 and Present, may or may not connect wirelessly using the wireless output of the GDZW7-ECO as outlined in the manual. Overall, results may vary and compatibility with openers that use security+ 2.0 is not guaranteed at this time.

Solution for Chamberlain and Liftmaster Brand openers

Currently there is no commercially available way to guarantee connectivity with Chamberlain and Liftmaster openers that use Security+2.0 with Wi-Fi logo that do not connect using the procedure outlined in the manual.
