

Ecolink Smoke Listener Mounting Location with Nest Smoke Detectors

Due to unique speaker performance and acoustics, the Ecolink Smoke Listener (FireFighter) will need to be mounted on only two specific sides of the Nest Smoke Detectors to guarantee detection. Below is an image showing those mounting locations.

The Ecolink Smoke/CO Listener can be placed between 0-6" from the edge of the Nest smoke detectors on ONLY TWO SIDES and function normally.

Please refer to the image to visually identify which two sides are acceptable.
